

The **Point “Family” Foundation** (the “Foundation”) was incorporated as a nonprofit charitable private foundation with a mission, “To positively impact the lives of children and young adults.”

The Foundation was created and funded by its Founder, Mallard and Mitchell to provide leadership and financial resources for inspired philanthropy that will directly impact the life of Humanity through education, technology, sustainable developments and quality resources to rural communities.

The Foundation has been a life-long journey of its Founders and family to turn the principals of business success into the principals of human significance. In order to distribute limited resources, donations made by the Foundation are prioritized for nonprofit organizations and community program that are aligned with the Foundation’s mission.

Successful philanthropy requires a high level of accountability and stewardship of financial and human resources. In order to optimize the impact of every dollar, the Foundation collaborates with nonprofit organizations and community programs to leverage financial resources and knowledge in pursuit of its mission.

The Foundation knows that the children we positively impact, or don’t impact today will become the leaders or burdens of our communities tomorrow. Please join in with the Foundation to positively impact the lives of children and young adults today, who will become the leaders of our communities tomorrow.

Sincerely,

Dedra Mitchell, Co Founder

Radiah Mallard, Co Founder
